

ANTIMOUSSES' GUARD®

RADICAL DESTRUCTION OF MOSS, LICHENS, ALGA AND FUNGUS

PRODUCT DESCRIPTION

ANTIMOUSSES'GUARD is a curative treatment providing long-lasting protection.

Preventative: the active matter is fixed into the support, stopping the proliferation of mould and making the germination of parasitic plants impossible.

Curative: destroys all the parasitic vegetation which is then eliminated by rain or by simple brushing.

ANTIMOUSSES'GUARD does not change the colour of the support, is not a film-former and does not turn yellow.

Replace the common acidic or alkaline detergents, which are always harmful to supports. Inoffensive towards the supports.

ANTIMOUSSES'GUARD is recommended to treat walls, roofs, balconies, fountains, basins, monuments, fences, terraces, patio blocks, boat hulls, awning blinds, tennis courts...

ANTIMOUSSES'GUARD has residual effects for 2 to 3 years after application (depending on the exposure).

CHEMICAL NATURE

- Quaternary ammonium compounds
- Non-ionic surface-active agent

ADVANTAGES AND CHARACTERISTICS

- Non-flammable
- Not dangerous
- Easy to use
- Strong ability to penetrate
- Product in aqueous phase
- Contains no acid, chlorine or nonylphenol
- Residual effects
- Can be used inside and outside
- Colourless so changing neither the aspect nor the nature of the support

PACKAGING

5 and 25 litre containers

TECHNICAL DATA

Physical condition 20 °C	: Liquid
Colour	: Greenish
Odour	: Citronella
pH	: 8 ± 0,5
Density	: 1.0 Kg/L
Solubility in water [vol/vol]	: Total
Flash point [°C]	: Not applicable

APPLICATION

- **ANTIMOUSSES GUARD** is ready to use but can be diluted up to 1: 2 with water.
- Apply in dry weather on a dry or slightly wet support, by spraying until the surface is saturated. If the support is badly infected, try brushing it down before application.
- Allow to act for 10 to 15 days. Be careful, as if applying in cold weather (less than 10 °C), the de-mossing will take longer
- Eliminate the residue by brushing or by just letting the weather take care of it naturally
- If it rains in the 48 hours following the treatment, it must be repeated.

COVERAGE PER LITRE

Consumption depends on the importance of the moss or the lichens.

Average yield given for reference only:

8 - 12 m² / litre

CLEANING THE MATERIAL

- Immediately after being used, clean the tools and equipment in water.

STORAGE

- Store in fresh and dry area.
- Do not store in a temperature lower than 5°C as it reacts badly to the cold.

RECOMMENDATIONS

- To obtain the best look and results on application, **ANTIMOUSSES'GUARD** should be shaken before use and must only be used when the temperature of the surfaces to be treated is greater than 5°C
- Take care not to spray onto the surrounding vegetation
- Do not apply if raining.
- Never dilute or mix with another product.

HEALTH / SAFETY

- Respiratory Protection: Under normal conditions of use where adequate ventilation is available, no special respiratory protection equipment is required.
- Hand Protection: Wear gloves
- Skin Protection: No special protective clothing or skin protection is required under normal conditions of use
- Eye Protection: If there is a real risk of splashing, wear protective goggles
- If swallowed: do not induce vomiting. Contact a doctor or a specialist
