Specification writers: These values are not intended for use in preparing specifications. Please contact your local **Geocel® Sales Representative** prior to writing specifications on this product.

SURFACE PREPARATION

Ensure surfaces are wet thoroughly with clean water before application.

APPLICATION

Depending on the level of pollution **Geocel® Ecochem Patio and Paving Cleaner** should be diluted with water as follows:

Light / Medium pollution: 1 part product to 10 parts water / 1 part product to 5 parts water

Medium / Heavy pollution: 1 part product to 5 parts water / 1 part product to 1 part water

It is recommended that a plastic bucket is used for diluting **Geocel® Ecochem Patio and Paving Cleaner**.

Moving from top to bottom, apply with a brush or using low pressure spraying (avoid using a very fine mist).

Take care when applying near decorative surfaces with stainless steel, brass, copper or aluminium. Immediately clean up and thoroughly rinse any spills or misapplied product.

Leave it to activate for 5 to 10 minutes then scrub with cold clean water until the surface is clean.

It is essential to completely wet porous surfaces before application and rinse them thoroughly afterwards.

DO NOT allow the product to dry in.

Avoid contact with calcareous materials such as marble and travertine, if in doubt undertake a trial application in an inconspicuous area.
